Greg Christian Catering Food Mileage Map

A “food mile” is a term that shows the distance that food travels from the time of its production until it reaches the consumer. We are creating a database of the *food mileage* on every product that we currently use.

RECYCLING

At Greg Christian Catering and Events we recycle for both catered and corporate events as well as in our kitchen and offices. All of our plates, forks, knives, spoons, napkins and cups are made of biodegradable material. Through the help of Ken Dunn with the Resource Center in Chicago, we have gone from 42 yards of waste a week to 5 yards.

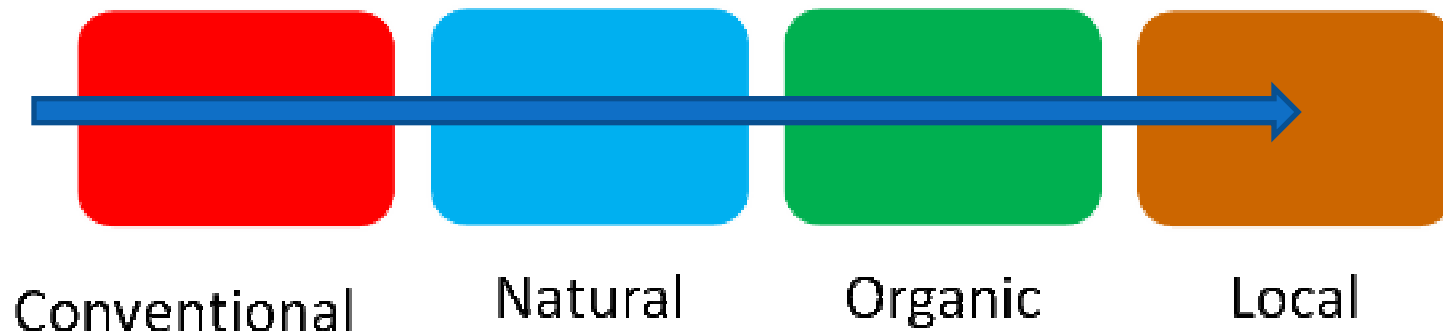

COMPOSTING

At Greg Christian Catering and Events we are committed to composting in order to keep food waste out of landfills. We also donate our used cooking oil to a local farm, FarmGirl Organics, for their biofuel car.
